BACKGROUND:

Assessment of the English language skills of students at Al-Amal Special Education School in Muscat follows as closely as possible the system used in mainstream schools, as described in the Student Assessment Handbooks published by the Center for Educational Assessment and Measurement (CEAM) of the Ministry of Education.

However, the system is adapted to take into account the fact that, owing to the students' serious hearing impairment, teaching and assessment should focus exclusively on the written word: i.e., the skills of Reading and Writing, supported by knowledge of Grammar and Vocabulary.

For Grades 1 and 2:

Student Assessment of the English language skills at grades one and two is based on the outcomes identified in the new **TEAM Together Oman 1 & 2 textbooks**. It replaces all previously-issued student assessment for English and will be implemented **from September 2022**.

This **Assessment** of the English language skills is aligned to the Common European Framework of Reference for Languages (CEFR) Levels, *The Global Scale of English (GSE) outcomes*, *Cambridge English Qualifications Tests*, *English benchmark tests* and *International Certificate Young Learners (PTE YL)*.

The table below indicates the correlation between the Student Assessment Handbook' (SAH) **Grades 1 to 4** outcomes, Team Together Oman course and various international frameworks and tests.

	CEFR	GSE	PTE YL	English benchmark	Cambridge English Qualifications
Grade 1	Pre A1	10-22			PreA1 starters
Grade 2	Pre A1/A1	17-29	First words	Level 1	
Grade 3	A1	20-32	Springboard	Level 2	
Grade 4	A1 /A2	24-39	Quickmarch	Level 3	A1 Movers

Team Together Oman provides many opportunities to get pupils acquainted with the format of external exams including Cambridge English Qualifications and PTE Young Learners. It is additionally aligned to English Benchmark test for young

learners aged 6-13 which measures pupil proficiency progress through wide variety of fun Formative assessment activities, with immediate detailed reports about the pupil's strength and weakness and recommendations for support and improvements.

A. E-Assessment

It is the process of applying different information technology tools or resources such as educational platforms (Google Classroom/ Google Meet), educational software, and Apps (Word wall) and using various educational methods to collect students' responses. Teachers can use different Continuous Assessment (CA) tools, both formative and summative such as discussions, projects, reports, homework assignments, in addition to quizzes, short tests and examinations. Teachers can then analyse these to help them identify the impact of teaching and learning in the educational process. Furthermore, this will enable teachers to make valid, reliable and informed judgements based on quantitative and qualitative data.

B. Moderation

Continuous Moderation

The purpose of moderation is to ensure that the criteria for awarding marks are being applied ***fairly*** and ***consistently*** at different schools across the country. In Grades 1 to 12, ***continuous moderation*** is to be carried out, as a process of on-going consultation and teacher-development. This process is generally conducted at a ***local*** level, with teachers coming together to compare notes and discuss students' work.

The purpose is to arrive at a ***shared understanding*** of the criteria used for assessing the work and awarding different marks or grades.

Final Moderation Grade 12 only

Of the several possible methods, which can be used for Formal Moderation, the Ministry has chosen to focus on 'moderation visits'. These are held towards the end of each semester, shortly before the exams.

For an exact, step-by-step description of the procedures and requirements for Final Moderation Visits, please refer to the documents produced by the ***Moderation Department*** at the CEAM.

For this purpose, teachers will need to provide visiting moderators with convincing ***evidence*** that the marks which they have awarded for Continuous Assessment are fair and accurate, and in line with national assessment criteria.

Discussions will centre on the completed CA mark sheet for each class:

- a) All marks awarded on this sheet should be based on the criteria shown in the official Rating Scales.
- b) **Only** the marks specified in these scales should be awarded.
- c) This also means that a mark of 'zero' should not be awarded for any outcome, except in very exceptional circumstances.

READING

Class-based Reading

- For each student in the class, **at least four** samples in which students wrote responses to Reading texts. Each sample, should be accompanied by the relevant text (with instructions) and the date.
- The samples should include different types of reading texts (See: reading outcome & rating scale).
- The length and the level of difficulty of the reading texts and tasks should be suitable for Grade 12.

WRITING

- For each student in the class, **at least two** typical samples of each of the main types of Writing required. These pieces of work can come from classwork, homework, projects, generic tasks, etc., provided that they fit the intended category (type) of Writing. They should be dated and annotated with marks and comments from the teacher. Needless to say, they should be genuine pieces of Writing which actually show the student's level of Writing skills.
- Possibly also, the teacher's written notes about individual students' Writing skills (e.g., strengths and weaknesses).

C. Reporting

Parents receive four reports regarding their son's or daughter's achievement in the learning outcomes for English for the year:

- In the middle of Semester 1, a '**descriptive**' report
- At the end of Semester 1, a '**full**' report
- In the middle of Semester 2, a '**descriptive**' report
- At the end of Semester 2, a '**full**' report for the whole year

The descriptive report does not include any marks or grades. Instead, it provides a brief comment usually consisting of 10 to 15 words. (Note: This comment will, of course, appear on the Report Card *in Arabic*.)

By contrast, the *full report* does not include any comments. It simply gives information about the student's final percentage mark and letter-grade for English. In this case, it is the accuracy of the data provided which is important. Teachers should take care that any calculations that they have made are correct and that no mistakes have been made in copying data from one place to another.

- In Grade 12 students are awarded the General Education Diploma on completion of Post-Basic Education.

D. LEARNING OUTCOMES for GRADES 1 to 12

- In Grades 1 to 4, the learning outcomes for English are grouped into **two skills**:

Reading

Writing

- During the four-year period covered by Grades **1** and **4**, the main focus of each element shifts and progresses, as follows:

Skills	Beginning of Grade One	>>> End of Grade Four
Reading	Recognising the letters of the alphabet	>>> Understanding texts of different types
Writing	Writing numbers and the letters of the alphabet	>>> Writing short texts of different kinds

In Grades **5** to **12**, the learning outcomes for English are grouped into **four elements**:

Reading

Writing

Grammar

Vocabulary

In **Grades 5 & 6**, a total of **Six** key learning outcomes have been identified:

Elements	Main Learning Outcomes
RDG	Can understand different types of written texts.
	Can read independently.
WRT	Can write sentences.
	Can write short texts.
GRM	Can understand and use the grammar already taught.
VCB	Can understand and use vocabulary already taught.

In **Grades 7 to 12**, however, there are a total of **Eight** key learning outcomes.

Elements	Main Learning Outcomes
RDG	Can understand a variety of written texts.
	Can read independently.
WRT	Can write texts with the purpose of providing information. (<i>Informative</i>)
	Can write stories and narrate events in the past. (<i>Narrative</i>)
	Can write and respond to letters and e-mails. (<i>Interactive</i>)
	Can write texts which express and justify opinions. (<i>Evaluative</i>)
GRM	Can understand and use grammar.
VCB	Can understand and use vocabulary.

The weightings for each element at each grade-level are as follows:

Elements	Grade 1 + 2		Grades 3 + 4			Grades 5 to 9				Grades 10 + 11			Grade 12		
	CA	Total	CA	CLTs	Total	CA	CLTs	SMT	Total	CA	SMT	Total	CA	SMT	Total
Reading	50%	50%	35%	15%	50%	15%	5%	15%	35%	15%	20%	35%	15%	20%	35%
Writing	50%	50%	35%	15%	50%	15%	5%	15%	35%	15%	20%	35%	15%	20%	35%

[Note: CA = Continuous Assessment; CLTs = Class Tests; SMT = Semester Test]

2. GATHERING INFORMATION TOOLS

The aim of this section is to provide information and guidance which will help teachers to maximise the quantity and quality of the assessment information that they gather.

- This section includes **SIX** main tools for gathering assessment information:
 - **Day-to-Day Observation, Classroom Questioning, Written Work** — are examples of assessment as **an integral part of teaching**. Here, the emphasis is on the need for teachers to conduct constant, on-going assessment of both individuals and the whole class, so that he/she can note progress, identify problems and find solutions.
 - **Quizzes, Classroom Tests (CLTs) and End-of-Semester Tests (SMTs)** — are instruments and procedures which are designed specifically for assessing student learning.

2.1 DAY-TO-DAY OBSERVATION

To 'observe' is '**to watch someone or something carefully**'. Teachers should continually observe, and record observations of their students in the classroom/virtual classroom.

Implementation

- Teachers should observe not only individuals, but also groups and the whole class.
- Daily observation involves paying close attention to:
 - what students write
 - what students do
 - which strategies students use to carry out tasks
 - how students react to new input
 - how students interact with each other
 - what is revealed by their facial expressions and body language
 - what is revealed by their self-assessments

2.2 CLASSROOM QUESTIONING

Classroom Questioning is one of the most important tools for investigating students' learning. It involves using different types of questions to gather useful, reliable information to assess student learning. One of the advantages of classroom questioning is that, if the first question does not work as expected, the teacher can 'try again' by re-formulating the original question or by asking a new, follow-up question.

2.3 WRITTEN WORK

The teacher can also gather useful information by looking closely at students' written work — whether this work has been done in class, as homework or as part of a project.

Teachers should use written work as an assessment tool because:

- It provides detailed information, especially about students' Writing.
- It provides an easily-accessible and permanent record, which shows students' progress over time.
- It can be examined by the teacher at any time and place, so she is able to concentrate fully, without distractions.

Implementation

- Written work can be time-consuming, so students may have to produce their written work outside of the classroom.
- The teacher must make sure that all written work has been done by the students themselves, without inappropriate assistance from others (parents, family, friends, the Internet, etc.)
- Teachers should follow a strict policy of ***not accepting*** any work which has not been done by students. This policy should be explained clearly at the start of the school year and applied consistently.
- If students submit written work electronically, teachers should actively encourage students to submit written work in their own handwriting, scan, and upload as a file **or** writing directly using *Handwriting Apps*.

2.4 QUIZZES

Quizzes are a more ***informal*** type of test than CLTs. They can be used at any grade-level to gather additional information about students' learning.

- There are no fixed marks for quizzes. Any information obtained from quizzes should be combined with information obtained from other sources or 'tools'
- Quizzes are a useful assessment tool, but tests of this kind should **not** become the main — and certainly not the only — assessment tool used by the teacher.

Implementation

- Quizzes should be done during normal classroom teaching.
- They should be **very short**, lasting **no more than 10 minutes**.
- The teacher *may* or *may not* wish to tell students about a quiz or give students information about the specific topic or focus of the quiz in advance.
- It is possible to use a wide variety of different test formats (types of tasks).
- Unlike CLTs, quizzes will often have a relatively narrow focus, e.g., on a very specific learning outcome or language point.
- Teachers are recommended to use any available electronic Apps in *Google Classroom platform* such as *Quiz Assessment* to prepare quizzes.

Assessment

- There is (usually) no need to prepare a written Marking Guide; a more informal approach will be sufficient.
- Scores from quizzes should be combined with information about each learning outcome, gathered using other tools, to award **Continuous Assessment** marks using the appropriate Rating Scale(s).

2.5 CLASS TESTS (CLTs)

A 'test' is a specially-designed procedure for gathering information about students' achievement of learning outcomes.

- In a typical testing situation:
 - The same tasks are carried out by all of the students.
 - There is a time-limit within which the tasks must be completed.
 - Students must work independently.

- There is a marking guide, with either the correct responses or a rating scale (set of criteria) for judging the quality of students' responses.

In **Grades 3 to 4**, there will be **three** Class Tests.

- Each of these three tests will receive a maximum of 10 marks. So, the total CLTs marks will be **30%** of a student's overall mark for English.

In **Grades 5 to 9 only**, there will be **two** Class Tests per semester.

- Each of these two tests will receive a maximum of 10 marks. So, the total CLT mark will be **20%** of a student's overall mark for English.
- Each test will consist of 2 sections, which will focus on **two different elements**, with 5 marks for each.
- In the special case of GRM/VCB, the section should consist of two sub-sections (VCB and GRM), each with 5 items (Note: Half-a-mark for each item).
- The teacher is responsible for preparing items and questions for each test paper manually OR electronically using the provided Google Form in the Google Classroom Platform.
- Test-writers should focus on the key learning outcomes (e.g., 'Can...') and cover them as well as possible within the limited time available.
- Test-writers should try to give all the students a fair chance to show what they can do. This can be achieved by including both easier and more challenging tasks/items in the tests. Over the three CLTs, teachers should vary the test-formats (i.e., types of tasks) that they use. However, it is essential that the task-instructions are clear and that the students know what to do. So, test-writers are advised to use task-types which are already familiar to the students. Each test must provide a valid assessment of students' language skills. For this reason, teachers **should not** use any Reading texts which students have already heard or seen. Teachers may, therefore, have to create their own simple texts, similar — but not identical — to texts in the course materials. Likewise, tasks set in the Writing section **should not be identical** to tasks which students have already done in class.

- Unlike in Classroom Questioning, the test-writer does not have a 'second chance' to produce a well-worded question. So great care should be taken to produce test-items that are clear and free of any errors.
- To help ensure the quality of the test papers, it is recommended that, test-writers should not work alone, but ***together with other teachers***. At the very least, they should ask another teacher to check their test paper before giving the test. The most reliable way to check any test, is for teachers to try it themselves.
- It is also a good idea to review the quality of the test paper again after the students have taken it. Take note of any unexpected problems which occurred in your items (or marking guide). Learn from these problems and improve your test-writing performance next time!

Implementation

- CLTs should be ***short***, the duration for each Test is as follow:
 - Grades 3 & 4 test last not more than 30 minutes.
 - Grades 5 & 6 test last not more than 35 minutes.
 - Grades 7, 8 & 9 test last not more than 45 minutes.
- They should be administered as part of **normal lessons**.
- Students should be informed in advance of the dates, and of the two elements which will be tested. However, *no further information should be provided*.
- During the test, students will be expected to work individually. Students should ***not*** be allowed to copy from each other, or otherwise share answers, during the test.
- **Assessment**
- Each test-paper should be accompanied by a written ***Marking Guide***. For some types of tasks (e.g., RDG, GRM and VCB), teachers can simply make a list of correct answers, with a specified number of marks for each. For others (e.g., WRT), a Rating Scale will be required: this can be 'borrowed' or adapted from the official CA Rating Scales.
- Immediately after marking any particular CLT, teachers should enter the students' marks in ink on the '*Summary of Marks Awarded*' (SMA).

2.6 SEMESTER TESTS (SMTs)

The Semester Test is a formal examination given at the end of each semester. It covers four of the elements: **GRM, VCB, RDG & WRT**.

- In Grades 5 to 9, **40 marks** will be awarded for the Semester Test.
- In Grades 10,11 **60 marks** will be awarded.
- In Grade 12 **70 marks** will be awarded
- The duration of each Semester Test will be as follows:
 - Grades 5 & 6: One-and-a-half hours. (90 minutes)
 - Grades 7, 8 & 9: Two hours (120 minutes)
 - Grade 10: Two-and-a-half hours. (150 minutes)
 - Grades 11 & 12: Three hours (180 minutes)
- Students who fail to achieve the overall pass-mark (50%) for the year's work will have the opportunity to try again as follows:

In Grades 5 to 12:

- For those who fail in Semester One, a **Second Session** exam for that semester.
- For those who fail in Semester Two, a **Second Session** exam for that semester.
- For those who fail in Semester One and Semester Two, **Second Session** exams for both semesters.

In Grade 11 only: - For those who fail in both semesters, a special **Re-sit Exam** covering work done throughout the year. (See Specifications in **Appendix Five**.) (**Note:** The Specifications used for each of these

Second Session papers are identical to those used in the First Session paper.)

Implementation

- In **Grades 5 to 11**, the **school** is responsible for preparing the exam papers.
- In Grade 12, the exam papers will be prepared and administered **centrally, by the Center for Educational Assessment and Measurement (CEAM)**.
- In Grades 10 &11 exams should be reviewed by the senior teacher & supervisor.
- All exam papers will be prepared according to the official Exam Specifications.

- Teachers should make sure that students are familiar, in advance, with all the test formats (task-types) which appear in the Specifications. They should in particular ensure that the task-instructions are clear and that the students know what to do.
- Students will also need to know on what basis marks will be awarded in the tests.
- The teacher is responsible for preparing items and questions for each test paper manually OR electronically using the provided *Google Form in the Google Classroom Platform*.
- Test-writers should try to give all the students a fair chance to show what they can do. This can be achieved by including both easier and more challenging tasks and items in the tests.
- In order to provide a valid assessment of students' language skills, reading texts which students have already heard or seen will not be included in the exams. Only unseen texts will be used. Sentences or short texts used in the GRM/ VCB section will, likewise, follow the same principle.
- Test-writers should also remember that language-learning is *cumulative*, and not focus solely on recently taught material.
- To help ensure the quality of the exams, test-writing will be done in a **collaborative** way, with a team of test-writers working closely together and supporting each other.
- It is also essential to review the quality of the test-paper again after the students have taken it. Taking note of any unexpected problems which occurred can help test-writers to improve their performance next time.

3. FORMATIVE ASSESSMENT

Formative Assessment is assessment for learning, with the aim of helping students to achieve the relevant learning outcomes. Its purpose is to improve achievement, typically by intervening in some way in the teaching-learning process.

- This kind of assessment tends to focus on the smaller outcomes which contribute towards the achievement of the larger outcomes. It is especially interested in 'how' and 'why' learning is achieved, and in what specific action can be taken to change things — always remembering that the larger outcomes are the long-term target.

- The following sections give information about two types of **Formative Assessment**:
 - Giving Feedback to Students
 - Student Self-Assessment

3.1 GIVING FEEDBACK to STUDENTS

can be defined as: '*Comments to students about the quality of their work with the aim of improving it*'. (Note: The work can be either already completed or still in progress.) Two points to consider regarding feedback:

- **Peer-Assessment:** Remember that you are not the only person in the classroom who can give feedback. Students should be given opportunities to give feedback *to each other*. This process — known as peer-assessment — not only helps to develop student self-assessment (see Section 3.2. below); it can also produce interesting, genuinely communicative classroom interaction.
- **Giving Written Feedback:** The comments, corrections and other notations that you put on students' written work are also a kind of feedback. As with *Classroom Questioning*, there are different ways to do this. You can simply insert the correct words for the student. However, it may be more productive and more beneficial to encourage student self-correction by:
 - either (i) only indicating where a mistake is, with no additional information.
 - or (ii) indicating where a mistake is and what type of mistake it is.
 - or (iii) writing a comment about a point which (overall) needs to be improved.

3.2 STUDENT SELF-ASSESSMENT

One of the central goals of Basic Education is that students gradually become autonomous learners, capable of deciding for themselves what they need to learn and how to learn it. Therefore, teachers are encouraged to use various **self-assessment activities**.
